Enclosure: RFP document

SECTION – I: INTRODUCTION & BACKGROUND

1. BACKGROUND &
INTROUCTION

1.1 The Directorate General of Quality Assurance (DGQA) (hereinafter referred to as the “**Authority**”) is under the Department of Defence Production (DDP), Ministry of Defence (MOD). The Authority provides Quality Assurance (QA) cover for the entire range of arms, ammunitions, equipment and stores supplied to the Armed Forces. The establishments under this organisation are spread all over the country specifically where mainly the Ordnance Factory Boards (OFBs), Defence Public Sector undertakings (DPSUs) and industrial base exist with an aim to provide an eco-system to foster innovation & technology development and encourage Indian industry to invest in the A&D sector.

1.2 **Defence Testing Infrastructure Scheme (DTIS) (enclosed at Appendix I):**

Under “Make in India”, the GOI has accorded high priority to development of manufacturing base of aerospace and defence (A&D) sector in the country so as to reduce dependence on imports. Towards this, the Government has announced establishment of Defence Industrial Corridors (DICs) in Uttar Pradesh (U.P.) and Tamil Nadu (T.N.). Several other initiatives such as preference to procurement from Indian vendors under the Defence Procurement Procedure (DPP), simplification of Make procedure, introduction of simplified procedure for Make II sub-category, liberalization of the licensing regime & Foreign Direct Investment (FDI) policy by raising the cap on FDI in the defence sector, simplification of export procedure, streamlining of defence offset guidelines, innovations for Defence Excellence (iDEX) and Defence Investors Cell etc. have also been created with an aim to provide an eco-system to foster innovation & technology development and encourage Indian industry to invest in the A&D sector.

- 1.3 *Objective of DTIS:* The objective of the proposed Scheme is to promote indigenous defence production, with special focus on participation of MSMEs and Start Ups by bridging gaps in defence testing infrastructure in the country. Setting up of Defence Testing Infrastructure will provide easy access and thus meet the testing needs of the domestic defence industry.

One of the main impediments for domestic defence production is lack of easily accessible state-of-the-art testing infrastructure. The defence testing infrastructure (DTI) is often capital intensive requiring continuous upgradation and it is not economically viable for individual defence industrial units to set up in-house testing facilities. The DTIS aims at setting up of Greenfield DTIs (required for A&D related production), as a common facility under private sector with Government assistance in DICs (priority area) and other industrial clusters. The proposed scheme plans to enhance defence manufacturing industry by creating DTIs and addressing quality and certification requirements. The main focus would be on creating appropriate infrastructure for development and growth of the A&D industry in the country. The scheme will boost the indigenous defence production, with special focus on participation of MSMEs and Start Ups by bridging gaps in DTI in the country. Setting up of DTI will provide easy access and thus meet the testing needs of the domestic defence industry.

1.4 *Scope of DTIS:*

- a. The aim of DTIS is to set up 8 (eight) DTIs with a total grant-in-aid of INR 400 crore (Rupees Four Hundred crore) from the GOI;
- b. Each DTI will be setup through a Special Purpose Vehicle (SPV) (the Special Purpose Vehicle (SPV)/ Implementation Agency (IA), which may be promoted / constituted by private entities (industrial / manufacturing entity, industry associations, R&D / academic institutions, existing testing establishment entities etc.) and Government or public entities (DPSUs, State Governments, Central Government agencies etc.);
- c. The IA/ SPV will be incorporated as a Section 8 company under the Companies Act 2013.
- d. The scheme would provide financial assistance to the IA/ SPV in the form of grant-in-aid for setting up testing and certification facilities for manufacturers of defence equipment / systems;
- e. The financial assistance for each DTI facility will be limited to 75% (seventy five percent) of the project cost. The project cost for establishment of the DTI facility under DTIS (the “Project Cost”) shall exclude the cost of the land and the establishment cost. The broad norms for funding of DTIs shall be as follows:
 - I. Land: to be provided by IA/SPV
 - II. Capex for building: \leq 20% of Project Cost
 - III. Test equipment, installation, training: \geq 80% of Project Cost
- f. The test facilities planned to be set up have been divided into 3 (three) types, namely, Small, Medium and Large. The indicative estimated Project Cost of each type of DTI facility is given in the table below:

S. No.	Type	Estimated Project Cost (INR)	Nos
1.	Small	< 20 crore	03
2.	Medium	20 – 50 crore	03
3.	Large	> 50 crore	02

The project cost of EMI-EMC Test facility is estimated to be of Large category and Grant in aid will be upto 75% of the project cost as per DTIS guidelines given at Para 6.3 of Appendix –Q ’ of RFP

- g. The IA/SPV shall be responsible for operation and Management of assets created under the scheme by way of collecting user charges plus applicable GST.

- h. The IA/ SPV will be responsible for obtaining all necessary statutory approvals / clearances including those for environmental compliance and quality standards as applicable.
2. DTI Facility for EMI-EMC
- 2.1 Electromagnetic interference (EMI) and electromagnetic compatibility (EMC) are used for the testing of electronic components of various defence equipment. While EMI and EMC tests are performed across various industries, the testing requirements become quite complex and specific for the EMI/EMC testing being performed for defence-applications.
- Electronic components being integral part of many of the products in the 101 negative import list, EMI/EMC testing has a natural alignment to India's indigenisation initiative in defence. These tests are also not technically as complex as some critical defence systems and hence can be taken up by the private sector. In addition, as EMI/EMC testing finds applications across various sectors - such as electronics, telecommunication, commercial aerospace, space etc, developing EMI/EMC testing facilities will have synergies with the civil sector.
- EMI and EMC tests are used for testing of electronic components of various defence equipment. Though EMI and EMC tests are performed across various industries such as electronics, telecommunication, commercial aerospace, space etc., the testing requirements for EMI and EMC for defence applications are complex and specific. A demand gap assessment study on EMI and EMC tests was carried out.
- However, the total market for EMI and EMC tests for defence is estimated to be approximately INR 640 - 660 crore and it is expected to reach approximately INR 1,000 - 1,020 crore by the year 2030. This growth in demand for these testing requirements, is expected to be driven by increasing indigenisation in defence manufacturing and receive a further boost from the testing requirement of the electronic components that are also an integral part of many of the products in the one hundred one negative import list issued by MOD. The estimated market size and growth rate was also validated through interaction with various stakeholders already performing EMI and EMC tests in the country. However, against the INR640-660 crore demand, the total supply for EMI and EMC tests in the country is estimated at only INR 400 - 420 crores. EMI and EMC tests also have a natural alignment to India's indigenisation initiative in A&D sector. ,
- 2.2 Therefore, there is a requirement for setting up a DTI facility for EMI and EMC tests under DTIS. The proposed DTI facility for EMI and EMC tests shall also have synergies with the requirements of other sectors, which also makes it a compelling business case. The following certifications and standards would be required to be adhered to by the envisioned DTI test facility for EMI and EMC tests:
- (a) MIL-STD-461 F/G
 - (b) BIS standards
 - (c) ISO standards

(d) CISPR tests

(e) COTS standards and gas turbines are some of the examples of propulsion system.

The proposed integrated testing facility for EMI-EMC will provide the necessary testing infrastructure required for undertaking these tests. It should have the necessary certification/ accreditations to be able to provide certification and calibration of the component/ system/ equipment as per applicable standard and codes.

For further details on the nature of the tests that will be carried out by the proposed integrated testing facility, please refer to Appendix – P. The Appendix P lists the mandatory and additional tests for the proposed facility.

2.3

The DTI facility under the DTIS can be developed at any location pan India, as preferred by the Bidder subject to land being arranged by the Bidder. However, a location assessment was also carried out as part of the gap assessment study and preferred clusters were identified for setting up the EMI-EMC facility (1) Telangana (2) Karnataka (3) Tamil Nadu (4) Maharashtra (5) Gujarat and (6) Uttar Pradesh states were identified as suitable locations for setting up integrated EMI-EMC facility. This assessment takes into consideration existing manufacturing unit, ancillary industries, testing facilities and future demand for the same. Based on the key clusters, assessment of the A&D or other applicable policies in the states and available infrastructure for establishment of the DTI facility was also undertaken.

Tests and testing capability, range and capacity

17.3 As part of the tests and testing capabilities scoring criteria, Bidders will be required to provide details of the tests they will be providing as part of their DTIS facility. The marks will be awarded based on the test range, capability and capacity offered by the bidders for each test.

- Range: It refers to the operating range of the test equipment for each test. The bidder offering the highest range for a particular test will be awarded maximum marks of 0.3.

- Capability: It refers to the size of the equipment being tested. The bidder offering the highest capability for a particular test will be awarded maximum marks of 0.4.

Table 3 : Technological Capabilities

S. No.	Parameter	Supporting Documents / Details	Max Marks	Scoring
1.	Proposed mandatory tests (total 10 tests), as mentioned in Appendix P	Signed Undertaking by the bidder	<ul style="list-style-type: none"> • 10 marks • 1 mark per test 	<ul style="list-style-type: none"> • Maximum marks for each test will be allocated to the bidder offering the maximum range, capability and capacity for the test • The marks provided to other bidders will be proportionate to its proposed range and capacity for each test as compare to that of the highest range, capability and capacity proposed by any bidder

				<ul style="list-style-type: none"> • Calculation of the score is shown below this table along with an example
2.	Tests proposed in addition to the mandatory tests (total 20 additional tests), as mentioned in Appendix-P	Signed Undertaking by the bidder	<ul style="list-style-type: none"> • 20 marks • 1 mark per test 	<ul style="list-style-type: none"> • Maximum marks for each test will be allocated to the bidder offering the maximum range, capability and capacity for the test • The marks provided to other bidders will be proportionate to its proposed range and capacity for each test as compare to that of the highest range, capability and capacity proposed by any bidder • Calculation of the score is shown below this table along with an example

Total technical score for mandatory tests = \sum Technical score of each mandatory test

Technical score for each mandatory test = $\{0.3 * (\text{Range of the test proposed by the bidder} / \text{maximum range proposed by any bidder}) + 0.3 * (\text{Capacity of the test proposed by the bidder} / \text{maximum capacity proposed by any bidder}) + 0.4 * (\text{Capability of the test proposed by the bidder} / \text{maximum capability proposed by any bidder})\} * 1$

For example, let us say, for High Intensity Radiated Field (HIRF) test the maximum capacity proposed by any bidder is 1000 units per year. The highest frequency range for the test is 20 MHz to 40 MHz. The highest size/dimension of equipment being proposed to be tested for a radar of 1000 cubic-feet. Now if Bidder A proposes to provide an HIRF test for frequency range of 20 MHz to 30 MHz with an annual capacity of 900 units per year for a radar of 500 cubic feet, the technical score for the bidder for HIRF test will be given by:

Technical score for HIRF test for Bidder A = $\{0.3*(10/20) + 0.3* (900/1000) + 0.4*(500/1000)\} * 1 = \{0.15+ 0.27+0.20\} * 1 = 0.62* 1 = 0.62$

Similarly, total technical score for additional tests = \sum Technical score of each additional test

Technical score for each additional test = $\{0.3 * (\text{Range of the test proposed by the bidder} / \text{maximum range proposed by any bidder}) + 0.3 * (\text{Capacity of the test proposed by the bidder} / \text{maximum capacity proposed by any bidder}) + 0.4 * (\text{Capability of the test proposed by the bidder} / \text{maximum capability proposed by any bidder})\} * 1$

Certifications and military standards

17.4 As part of the certifications and military standards scoring criteria, Bidders will be required to provide details of the certifications they will be providing as part of their DTIS facility.

Table 4 : Certifications and military standards

S. No.	Requirement	Supporting Documents / Details	Max Marks	Scoring

APPENDIX Q - DTIS

DEPARTMENT OF DEFENCE PRODUCTION DTIS CELL / DGQA

12575/DGQA/DQA(WP)/DTIS Guidelines

14 May 20

DEFENCE TESTING INFRASTRUCTURE SCHEME (DTIS) - GUIDELINES

1. Context

1.1 Under “Make in India”, the Government has accorded high priority to development of manufacturing base of Defence and Aerospace sectors in the country to reduce dependence on imports. Towards this, Government has announced establishment of Defence Industrial Corridors (DICs) in Uttar Pradesh and Tamil Nadu.

1.2 One of the main impediments for domestic defence production is lack of easily accessible state-of-the-art testing infrastructure. Defence Testing Infrastructure is often capital intensive requiring continuous upgradation and it is not economically viable for individual defence industrial units to set up in-house testing facilities. The Scheme aims at setting up of Greenfield Defence Testing Infrastructure (required for defence and aerospace related production), as a common facility under private sector with Government assistance mainly in DICs.

2. Objective

2.1 The objective of the proposed Scheme is to promote indigenous defence production, with special focus on participation of MSMEs and Start Ups by bridging gaps in defence testing infrastructure in the country. Setting up of Defence Testing Infrastructure will provide easy access and thus meet the testing needs of the domestic defence industry.

3. Scope

3.1 The Scheme would provide financial assistance to private sector for setting up Testing and Certification facilities for manufacturers of defence equipment/systems. The financial assistance will be from Central Government in the form of Grant-in-Aid for setting up of Greenfield Defence Testing Infrastructures (DTIs) in the following verticals:-

- (a) Testing facilities for Drones / Unmanned Aerial Vehicles (UAVs)/Remotely Piloted Aircrafts (RPAs)
- (b) EMI/EMC Testing for Radars, UAVs/RPAs and Electronic/Telecom equipment
- (c) Rubber Testing for Defence and Aerospace Sectors
- (d) Radiated Noise and Shock Testing
- (e) Electronic Warfare
- (f) Software Testing
- (g) Specialised Test Driving Tracks
- (h) Ship Motion Testing
- (i) Test Facilities for Aerospace Industry
- (j) Ballistic and Blast Testing Facilities
- (k) Environmental Test Facilities

(l) Any other area in Defence manufacturing lacking testing infrastructure.

3.2 The DICs in UP and TN may be given preference for setting up of DTIs, being the focus areas. These corridors have been selected as they are expected to support large number of industries involved in defence and aerospace manufacturing in the future. However, the Scheme is not limited to setting up DTIs in the DICs only.

4. Eligible Agencies

4.1 Each DTI will be setup through a Special Purpose Vehicle (SPV), hereinafter referred to as the Implementation Agency, which may be promoted/constituted by private entities (Industry, Industry association, R&D/Academic institution) and State Government agencies.

4.2 The Implementation Agency under the Scheme shall be a Section 8 company registered under the Companies Act, 2013.

4.3 Only private entities registered in India and State Government agencies will qualify for forming the Implementation Agency.

4.4 The Central Govt assistance for setting up DTIs will be in the form of Grant-in-Aid and will be limited to sum total of Rs 400 Cr. Assistance for individual DTI under the Scheme shall not exceed 75% of the project cost. The balance of the project cost will be borne by the Implementation Agency.

4.5 At least 5 private entities and state government agencies may constitute the Implementation Agency. However, contribution from any of the Implementation Agency constituents cannot exceed 40% of the share capital of the Implementation Agency.

4.6 All the constituents of SPV (Implementation Agency) shall have positive net worth. This condition is relaxed for companies registered with Startup India. Any company black listed by Central or State Government will not be eligible to be part of SPV.

4.7 At least three constituents of the SPV should be in existence for more than three years and no relaxation will be provided in this regard.

4.8 The SPV (Implementation Agency) shall be responsible for obtaining statutory clearances required for testing of weapons and ammunition.

5. Role of the Implementation Agency

5.1 The Implementation Agency shall be responsible for setting up of DTI under the Scheme. The Implementation Agency shall be also responsible for operation and maintenance of assets created under the Scheme, in a self-sustainable manner, by way of collecting user charges plus applicable GST.

5.2 Cost of land is not proposed to be funded under the Scheme. Land for DTIs would be arranged by the Implementation Agency. In case the Implementation Agency is not owner of the land, they should have lease for the land for at least 30 years from the date of response to RFP. Land availability with Implementation Agency shall be essential condition for consideration of applicant's response.

5.3 The Implementation Agency will obtain all necessary statutory approval/clearances including those for environmental compliance and quality standards as applicable.

5.4 The respondent shall indicate the manner and modalities for operation and maintenance of the testing facility after its creation in its proposals for consideration of assistance, as a part of the DPR submitted in response to RFP issued by MoD/DDP.

5.5 The Implementation Agency shall be responsible for ensuring that procurement of all items, equipment and services, including works, are through a transparent and competitive bidding process. Appropriate performance guarantees should be built in the agreement to ensure timely and good quality delivery of goods and services procured.

5.6 The Implementation Agency shall execute an undertaking for proper utilization of the grant and abide by the target dates, as may be specified in the conditions of the Grant. It shall not divert the Grant for any other purpose. In the event of failure to comply with the conditions or breach of the undertaking, it shall be liable to refund to President of India the entire amount of the Grant. The undertaking is to be submitted by the Implementation Agency in a format as specified in RFP.

5.7 The Implementation Agency shall also execute an undertaking that the said project is not being funded under any other scheme of the Government of India. The undertaking is to be submitted by the Implementation Agency in the prescribed format as may be specified in the RFP.

6. Extent of Financial Assistance

6.1 The DTI Screening Committee (DTISC) constituted as per **Annexure 'A'** for approval of the projects will be the final authority to take decision on the proposals submitted by the Implementation Agency.

6.2 The total Central Govt assistance for setting up 06 to 08 DTIs will be in the form of Grant-in-Aid not exceeding Rs 400 Cr. The extant GFR provisions will be followed for setting up the DTIs. The test facilities planned to be set up can be divided into three types, namely, Small, Medium and Large. The estimated cost of each type of facility is given in the table below:-

SI No	Type	Estimated Cost	Nos
(a)	Small	0<20 Cr	03
(b)	Medium	20-50 Cr	03
(c)	Large	>50 Cr	02

The number of test facilities under each type may be varied, if need arises.

6.3 Assistance for individual DTI under the Scheme shall not exceed 75% of the project cost. The remaining project cost will be borne by the Implementation Agency.

6.4 For the purpose of calculating the extent of contribution of the Implementation Agency under the Scheme, the cost of land or such other component as may be specified

in EoI or RFP shall not be included in the project cost. The broad norms for funding of DTIs shall be as follows:-

- | | | |
|-----|--|-------------------------|
| (a) | Land | - to be provided by SPV |
| (b) | Capex for building | ≤ 20% of Project Cost |
| (c) | Test Equipment, Installation, Training | ≥ 80% of Project Cost |

6.5 No recurring expenditure or any establishment cost will be funded by Central Government under the Scheme.

6.6 Studies related to identification of defence testing infrastructure gaps and mapping of facilities, impact study etc may be done by engaging professional help after obtaining approval of DTISC.

7. **Submission of Proposal**

7.1 **Expression of Interest**. Expression of Interest (EoI) may be issued by DDP/DGQA to seek preliminary response from private entities willing to set up defence testing infrastructure. The EoI shall clearly indicate the Preliminary Qualitative Requirements (PQRs) of the testing infrastructure intended to be set up.

Measurable outcomes should be indicated in the proposal, e.g. expected reduction in testing costs and time if the testing infrastructure is set up. The Proposal in the prescribed format may be filed by a private entity intending to form an SPV. The format of the Preliminary Proposal will be as specified in the EoI.

7.3 **Request For Proposal**. The Staff Qualitative Requirements (SQRs) may be refined after receipt of responses to EoI. For selection of Implementation Agency for execution of each DTI project, Request For Proposal (RFP) may be issued to the shortlisted participants of the EoI who meet the specified criteria.

7.4 **Submission of Response to RFP**. The Final Proposal, in the prescribed format, alongwith Detailed Project Report (DPR) and associated documents shall be submitted by the respondents in response to the RFP. The format of the Final Proposal will be specified in the RFP. The respondents will prepare the DPR (as prescribed in RFP), covering the technical, financial and implementation aspects, timelines for completion of the project including those for achieving financial closure, and the monitoring mechanism proposed to be put in place.
